

Jiatong Han

Last updated: June 2026

School of Management, Zhejiang University

Email: hanjt@zju.edu.cn

Phone: +1 (626)704-8150 Website: tt-08.github.io/jiatonghan

Education

Visiting Student Researcher, Caltech 2023.11 - 2025.10

Advisor: Colin Camerer

Ph.D. Candidate in Management, Zhejiang University 2020.09 - 2026.12 (expected)

Advisor: Fadong Chen

Dissertation: *Peer Effects and Dynamic Mechanisms in Goal-Oriented Individual Behavior*

B.E. in Logistics Engineering, Chongqing University 2016.09 - 2020.06

Research Interests

Behavioral and Experimental Economics, Peer Effects, Judgment and Decision Making, Neuroeconomics

Publications

1. Risk Preference Elicitation in Finance: Survey vs. Experiment

Fadong Chen, **Jiatong Han**, and Leo Bao (2026). *Journal of Behavioral and Experimental Economics*, 122, 102565.

Using data from 108 retail investors on a wealth-management FinTech platform, we elicit risk preferences via both a standard survey and an incentivized Holt–Laury task, and find that the experimental measure outperforms the survey in predicting actual portfolio choices over short and medium horizons.

Working Papers

1. Dynamic Peer Influence on Honest Participation and Strategic Misconduct in Performance-based Institutions [*Job Market Paper*]

Jiatong Han, Xiaozhi Yang, Yubai Yuan, Fadong Chen, and Colin F. Camerer.

Using panel data on 4,868 students and over 764,000 GPS-tracked sessions in a mandatory university running program, we find that peer behavior—among randomly assigned roommates and self-selected dining companions—predicts both subsequent engagement and whether students participate honestly or game the system, with patterns more consistent with social comparison than simple conformism.

2. Predicting Experimental Asset Bubble Returns using Machine Learning and Emotions

Ross Spoon, Thomas Henning, Mihai Toma, **Jiatong Han**, Cady Ngo, Alec Smith, and Colin Camerer.

Combining experimental asset markets with biometric data, we use Support Vector Regression and linear models to show that financial metrics (lagged returns and order book imbalances) outperform biometrics in predicting contemporaneous returns, while individual electrodermal activity predicts personal de-risking and revealed risk aversion; high earners show anticipatory arousal before crashes, whereas low earners display reactionary spikes.

3. LLM Trading: Analysis of LLM Agent Behavior in Experimental Asset Markets

Thomas Henning, Siddhartha M. Ojha, Ross Spoon, **Jiatong Han**, and Colin F. Camerer.

We compare large language models (LLMs) with human traders in a classic experimental-finance market where prices are set endogenously by participants' orders. LLM agents price

near fundamental value and form bubbles only weakly, whereas humans consistently generate large bubbles; the gap persists under dividend shocks and experienced runs, underscoring the risk of using LLM-only agents to model human-driven market phenomena.

Work in Progress

1. **Comply, Game, or Quit: Hidden Behavioral States under Quantified Goals**
2. **Effects of External Information Presentation by Autonomous Vehicles on Pedestrian Crossing Decisions** (*with Jiecheng Ma and Fadong Chen*)

Conference, Seminar and Workshop Presentations

- | | |
|--|------|
| 1. Economic Science Association (ESA) North American Meeting, Tucson, AZ | 2026 |
| 2. The 17th Symposium on Behavioral Operations Research and Behavioral Operations Management | 2025 |
| 3. The 14th Annual Southern California Conference in Applied Microeconomics (SoCCAM) | 2025 |
| 4. Annual Meeting of the Society for Judgment and Decision Making (SJDM), Poster | 2025 |
| 5. ESA Global Online Around-the-Clock Conference Program | 2021 |

Professional Activities

Referee Service

Reproducibility in Management Science	2023
---------------------------------------	------

Teaching Experience

Research Topics in Neuromanagement, TA for Prof. Fadong Chen	Spring 2026
Management Economics, TA for Prof. Fadong Chen	Fall 2021, Fall 2022

Skills

Programming & Tools: R, Python, LaTeX

Languages: Mandarin (Native), English (Fluent)

Interests: Bouldering (V4), Hiking, and Driving

Honors, Awards, and Scholarship

- | | |
|--|----------------|
| 1. OpenAI Researcher Access Program (\$5,000 in API credits) | 2025 |
| 2. China Scholarship Council Scholarship | July 2023 |
| 3. Outstanding Graduate of Chongqing City | June 2020 |
| 4. Tang Lixin Scholarship | January 2020 |
| 5. National Scholarship | September 2019 |
